

# Web Technology Practice Sheet on HTML & CSS

## Solved Essay Questions on HTML

### 1- What is meant by URL, define its parts.

URL stands for *Uniform Resource Locator*. A URL is the address of a given unique resource on the Web. There are different parts of a URL which are:

- a) Scheme : the protocol is HTTPS or HTTP (its unsecured version).
- b) WWW(Sub-domain) is the WWW subdomain of your domain name.
- c) Domain name is google.
- d) Top-level domain is .com means that the website is of the commercial nature.
- e) File Path The path refers to the exact location of a page.

### 2- What is HTML representing? What is the syntax of HTML elements?

HTML stands for Hyper Text Markup Language.

Hypertext refers to the way in which Web pages (HTML documents) are linked together. Thus, the link available on a webpage is called Hypertext.

Markup Language, HTML is a Markup Language which means you use HTML to simply "mark-up" a text document with tags.

**Syntax:** <beginning tag> content </closing tag>

### 3- Compare between inline and block elements.

**Block Level Elements** Appear on the screen as if they have a line break before and after them. <p>, <h1>, <h2>, <h3>, <h4>, <h5>, <h6>, <ul>, <ol>, <dl>, <pre>, <hr />, and <address> elements are all block level elements.

**Inline Elements.** Inline elements appear within sentences and do not have to appear on a new line of their own. <b>, <i>, <u>, <em>, <strong>, <sup>, <sub>, <big>, <small>, <ins>, <del>, <code>, <cite>, <dfn>, <kbd>, and <var> elements are all inline elements.

### 4- Write an HTML code for an order list begins with alphabet C.

<ol type = "A" start = "3"> <li> tea</li> <li> milk</li> </ol>

### 5- What are the types of method attribute of a Form?

HTTP **POST** requests supply additional data from the client (browser) to the server in the message body. (**form data appears in the message body**)

In contrast, **GET** requests include all required data in the URL. Forms in HTML can use either method by specifying **method="POST"** or **method="GET"** (default) in the **<form>** element. (**all form data is encoded in the URL**)

## Solved Essay Questions on CSS

### 1- Define the 3 main types of css.

- **Inline** - by using the style attribute inside HTML elements.
  - An inline CSS is used to apply a unique style to a single HTML element.
- **Internal** - by using a <style> element in the **<head>** section.
  - An internal CSS is used to define a style for a single HTML pagem in the **<head>** section of an HTML page, within a **<style>** element.
- **External** - by using a <link> element to link to an external CSS file.

To use an external style sheet, add a link to it in the <head> section of HTML page.

### 2- What are the possible border css attributes values?

The **border-color** specifies the color of a border. ( **Top, right, bottom ,left**)

The **border-style** specifies whether a border should be solid, dashed line, double ,dotted, dashed, outside, hidden ,line, or one of the other possible values.

### 3-What are the main CSS selectors, give examples.

- Element selector      **Example:**    <p class="center large"> paragraph </p>
- ID selector            **Example:**    #para1 { text-align: center; color: red; }
- Class selector        **Example:**    .center { text-align: center; color: red; }

- Attribute selector    **Example:**    `img[src]`  
selects `` but not `<img>`
- The universal selector    **Example:**    `* { text-align: center; color: blue; }`

**4- Write css code to make an ordered list with alphabetic labels.**

`ol {list-style-type: lower alpha; }`

## General MCQ Sheet

**1- Common application layer protocols include:.....**

- a) HTTP      b) DNS      c) FTP      d) A,b,c

**2- ..... Is not an Inline element in HTML.**

- a) `<h1>`      b) `<i>`      c) `<u>`      d) None of the Previous

- a. `<style src="styles.css">`      b. `<link rel="stylesheet" href="styles.css">`  
c. `<css href="styles.css">`      d. `<import stylesheet="styles.css">`

**10- The list-style-image specifies...**

- a) background-image      b) image position      c) arrange images      d) marker image

**11- ..... is the address of a given unique resource on the Web.**

- a) DNS      b) HTTP      c) URL      d) Scheme

**12- ..... Is the type of category in which the owner domain is registered**

- a) Scheme      b) Domain      c) Sub Domain      d) Top level Domain

**13- ..... refers to the way in which Web pages (HTML documents) are linked together**

- a) HTTP      b) Text      c) HTML      d) Mark Up

**14- .....Does not have a closing tag or any contents**

- a) <P>      b) <h1>      c) <Img>      d) <HTML>

**15- ..... is not a block level element in HTML.**

- a) <h1>      b) <i>      c) <p>      d) None of the previous

**16- ...is the largest heading in HTML**

- a) h1      b) hr      c) h6      d) head

**17- ... is styling HTML5 layout**

- a) PHP      b) JQuery      c) CSS      d) All of the above

**18- Metadata is contained in.....**

- a) HTML tag      b) Head tag      c) Body tag      d) Title tag

**19- .....is used to insert an image in html pages.**

- a) <img url="htmllogo.jpg" />      b) <img alt="htmllogo.jpg" />  
c)       d) <img link="htmllogo.jpg" />

**20- ...is used to create a text area in html.**

- a) <Text>
- b) <textarea>
- c) <input type="text">
- d) <input type="textarea">

**21- Which tag is used to create a numbered list in HTML?**

- a) <Nl>
- b) <ol>
- c) <ul>
- d) <dl>

**22- ...is used to link an external style sheet in the HTML file.**

- a) <link rel="stylesheet" href="style.css" />
- b) <link rel="stylesheet" src="style.css" />
- c) <style rel="stylesheet" src="style.css" />
- d) <style rel="stylesheet" link="style.css"/>

**23- ...is used to embed css in html page**

- a) <inline>
- b) <internal>
- c) <css>
- d) <style>

**24- ....creates a dropdown list.**

- a) <dropdown>
- b) <select>
- c) <input>
- d) <downlist>

**25- The .com at the URL represents....**

- a) Top-level domain
- b) Scheme
- c) Domain name
- d) Sub-domain
